PROJECTS

Adventurers Club | github.com/DobienC/Project3 | cryptic-mesa-14005.herokuapp.com/ May 2019 - June 2019

- Created a Dungeons and Dragons (D&D) web tool using the MERN Stack, bcrypt, and Json Web Tokens which resulted in a way to create, share, and explore D&D characters.
- This was my final project from my coding bootcamp. As a result, I worked on it alone and managed the full stack.

ACED - AGENT FOR COURSE AND EDUCATION DEVELOPMENT | dev.azure.com/DebuggersCSUS/Speaking%20Science Sep. 2018 - May 2019

- Collaborated with six other students and a client using Angular.js, C#, and TSQL to produce an online tutoring service for the client's students.
- As a front-end developer of the team, I helped design and populate data for the layout using Angular.js and the back-end team's APIs which resulted in a dynamic web page.

Pawnage | github.com/DobienC/Pawnage March 2019

- Programmed a computer AI (Pawnage) using C which produced a program to play against Pawnage in a board game similar to chess.
- Implemented Min-Max decision algorithm and Alpha Beta Pruning using a heap tree resulted in the AI to choose the most optimal move on its turn.
